Ordering the WEB-8000 Controllers

Some part numbers cannot be ordered through the B2B or EDI and must be ordered through email or fax. A guide has been created to assist with the process.

Email / Fax

The list of the part numbers that must be ordered via email or fax can be found here.

- US Fax - 866-222-3439
- Email - webs_orders@honeywell.com.

B2B / EDI

The WEBs-N4 software products and optional hardware modules can be ordered via B2B and EDI. The list of these part numbers can be found here.

There are two ways to order the New WEB-8000 controllers.

1. Bundled Branded option
2. Unbundled Branded option

Bundled Branded Option:

This option allows you to purchase a controller with core software and software maintenance. The software maintenance license clock starts the day the product is shipped. See below for details. We will also be providing you an Excel based selection tool, which makes it easier to select. Under this option, you can purchase one controller at a time. Please make sure you have the same quantity of Controllers, software and Maintenance parts selected. If you have different quantities, then you have to send multiple copies of this print out after making the selection. Please print this and either Fax or Email so that we can fulfill your order.

There are 6 steps that need to be followed while placing a purchase order for a WEB-8000 controller. We have provided an Excel based WEB-8000 Selection Tool that navigates you through the order process. The 6 steps are:

1. Specify Country where it is installed
        This is for WiFi application. This selection cannot be changed once shipped
2. Select the Controller with Niagara Core software
        WEB-8005, WEB-8010, WEB-8025, WEB-8100 or WEB-8200
3. Select Device pack (Optional)
        DEVICE-10, DEVICE-25 and DEVICE-50
4. Select Software Maintenance for the maximum number of devices you have selected
        SMA-8xxx-1YR-INIT, SMA-8xxx-3YR or SMA-8xxx-5YR
5. Select Optional modules (a maximum of 4 modules, see data sheet for combination)
        NPB-8000-LON, NPB-8000-2X-485, NPB-8000-232
6. Select if you want add a 24VAC Wall mount Power Supply

Every order of a WEB-8000 controller should specify the country of installation as this is required for WiFi settings that will shipped from factory. Once this is set, the controller's WiFi will

not work in another country, but the controller itself will function normally. This WiFi setting cannot be changed once it leaves the factory.

At any point after the controller is installed, if there is a need to expand the networks or add devices, you can purchase the part number that meets your needs (DEVICE-UP-XX). You do not have to purchase the software maintenance when you upgrade the devices. But when the current SMA expires, you would need to renew the SMA to the new number of devices.
In the notes section, you may write important information including hierarchy and Project name, etc that is used as part of the purchase order. If the attachment is not correct, your order will be rejected and will have to be re-entered.

The tool is not capable to take multiple orders, so we request you to enter one order per tool. We have created 3 tools in one sheet, to make it easy for you.

Example:

	My Multiplier	1.00		Distributors only: Email this form to: webs_orders@honeywell.com							
				Fax this form from USA to: 866-222-3439							
	Select Country of Installation for WiFi Option	Choose Controller with Niagara Core Software	Choose any OPTIONAL Device Packs of 10, 25 or 50 devices, then QTY of each pack			Choose Software Maintenance Agreement	Select OPTIONS (LON, RS232 or RS-485, max of 4 per controller) then QTY of each			Select Power Supply
QTY		1	1	1	0	1	1	1	1	1
Description	UNITED STATES	25 Devices / 1250 Points	10 Devices / 500 Points	25 Devices / 1250 Points	50 Devices / 2500 Points	1 Year Initial	RS-232 option	LON option	RS-485 option	Wall Mount 24V Adapter
Part Number	US	WEB-8025	DEVICE-10	DEVICE-25	DEVICE-50	SMA-8100-1YR-INIT	NPB-8000-232	NPB-8000-LON	NPB-8000-2X-485	WPM-8000
US Base Price		$ 3,230.00	$ 1,450.00	$ 1,975.00	$ 3,950.00	$ 900.00	$ 405.00	$ 440.00	$ 440.00	$ 95.00
Total US$		$ 3,230.00	$ 1,450.00	$ 1,975.00	$ -	$ 900.00	$ 405.00	$ 440.00	$ 440.00	$ 95.00
									Grand Total	$ 8,935.00

Un-bundled Branded Option:

Un-bundled branded option provides you the opportunity to purchase the controller and the Honeywell branded clips and stock it. These will be sold only in quantities of 15 units. When there is a need to use these controllers at a job site, you can then purchase the microSD cards (min qty of 15), the core software and software maintenance. The maintenance license clock starts when you purchase the software. The main advantage of this option is when a unit goes bad in the field, the controller on the shelf can be dispatched and installed with the same microSD card that was in the bad unit. The downtime will be very minimal.

The following two part numbers have to be purchased at the same time. You will also have to choose the country code at this time for all the controllers.

15 units of WEB-8000-CSE
15 units of Honeywell branded red clips (JACE-8000-BRAND)

The following can be purchased at any time:

3. 15 units of microSD cards (JACE-8000-uSD-CSE),
4. Software options (NC-8005, NC-8010, NC-8025, NC-8100 and NC-8200) and
5. Software Maintenance (SMA-8xxx-xYR-INIT or SMA-8xxx-xYR-xYR)
